All, For the most part, these appear ok to post. The only comment is that the "all workers" file contains a number of cells that are highlighted. I'm not sure the reason but it does draw attention to those individuals.

Tim

Tim,

Hi - Here are pdfs of the analytic files we used. I understand from Bob Benson that the identifying information has been appropriately removed.

I just wanted to double check that these were fine for posting on the SAB web site - as they will be available to the public. Again, we greatly appreciate your support of the review of our assessment by helping us provide these materials to the SAB.

Thank You,

Danielle

{As a note we need to make one minor correction to the dataset, but it will not change the nature of information provided. We need to remove one individual.}
